DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

Election/Restrictions

2. Applicant's election of Group I, claims 1-16 in the reply filed on 04 January 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

3. Claims 17-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 04 January 2006.

Priority

4. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Israel on 06 November 2003. It is noted, however, that applicant has not filed a certified copy of the Israeli application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-11 and 14-16 are rejected under 35 U.S.C. 102(e) as being anticipated by either Chen et al (Chen I, U.S. Patent Application Publication 2004/0115431 A1) or Chen et al (Chen II, U.S. Patent Application Publication 20050136772 A1).

Chen I (see the entire document, in particular, paragraphs [0006], [0014], [0027], [0032], [0082] and [0111]) and Chen II (see the entire document, in particular, paragraphs [0006], [0009], [0012], [0063] and [0093]) teach a process of making an abrasive nonwoven cloth as claimed, including the steps of forming a nonwoven web, patterning the nonwoven web and heat-treating the nonwoven web.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Chen et al (Chen I, U.S. Patent Application Publication 2004/0115431 A1) or Chen et al (Chen II, U.S. Patent Application Publication 2005/0136772 A1).

Art Unit: 1732

The recited denier (or decitex) would have been obvious to one of ordinary skill in the art at the time the invention was made in the process of either Chen I or Chen II principally in order to impart desired characteristics and/or properties to the abrasive nonwoven cloth.
